To Whom It May Concern

I am experiencing a full and peak cycle of menopause but I am not taking any oral medications nor am I applying any creams or patches. Why?

I attended a lecture and demonstration at the U.S. Psychotronics Association (USPA) convention in Louisville, KY during July of 2011 by researcher, inventor and scientist Brian David Andersen. Andersen has developed a new modality called *Light Particle Assimilation* (LPA) that features an individual wearing rather than orally taking vitamins, minerals and nutrients.

LPA is the foundation for a product called *Tri-Vibes* that was invented by Andersen and is sold by *Tri-Vortex Technology* and is the vanguard of health and nutrition. The stainless amulet container that is worn on a neck chain and all the ingredients of the novel *Tri-Vibes* are placed into the *Tri-Vortex Technology* treatment chamber for 24 hours. After the treatment period the light particles in the molecules of all the ingredients are stepped-up to high vibratory state.

Traditional science discovered every human, animal and plant cell is covered in a sheath of Phosphorous. Andersen has logically deduced that the only substances that pass through the Phosphorous sheath are light particles. After wearing the *Tri-Vibes* amulet for 20 days, the electromagnetic fields of the human body are saturated with the light particles of the vitamins, minerals and nutrients. The cells only pass light particles of the needed vitamins, minerals and nutrients through the Phosphorous sheaths according to Andersen. Very compelling blood tests conducted by SpectraCell Labs have indicated the *Tri-Vibes* provide more than adequate levels of vitamins, minerals and nutrients. The lab test results and additional vital information are on the webpage <http://trivortex.com/Tri-Vibes.html> and the entire *Tri-Vortex Technology* website is full of very unique facts and information <http://trivortex.com>.

I was interested in the *Tri-Vibes* technology, especially relating to the symptoms of menopause. I was taking multiple vitamin & mineral supplements orally and using bio-identical hormone replacement Estradiol cream and progesterone capsules on a daily basis. I placed a special order with Andersen and sent him samples of my bio-identical HRT, hormone patch and supplements that are not included in his standard ingredient list of vitamins and minerals. All the ingredients including the adhesive patch were placed in the *Tri-Vortex Technology* treatment chamber for 24 hours. My special ingredients were chopped, pulverized and blended with the normal vitamins, minerals and nutrients contained in the *Tri-Vibes*. Shortly afterwards I received my order of two amulets, a velvet patch and ankle chain.

I began my experiment on November 3, 2011. I wore the two amulets and carried the velvet pouch in my pocket 24/7 and continued taking my HRT and vitamin and mineral supplements for the remaining 30 days of the Rx. This crossover period, according to Andersen, allowed the light particles of the medications, vitamins and minerals to build-up in the electromagnetic fields of my body. I continued to wear the amulets and pouch for six weeks after discontinuing all oral, patch and cream medications and all oral vitamins, minerals and nutrients with no negative side effects.

But most importantly my normal menopausal symptoms that occurred while taking, wearing and applying my normal medications and the oral vitamins and minerals totally subsided. I reduced my exposure to one amulet and pouch for another six weeks with no negative side effects. I am now wearing only one *Tri-Vibes* amulet during my waking hours and am no longer experiencing menopausal symptoms with no negative side effects. Gone are those annoying "hot flashes" and night sweats. Another key benefit is I save approximately \$120.00 or more per month because I no longer purchase the expensive capsules, creams, patches and supplements.

The hormonal replacement *Tri-Vibes* are truly an amazing technology. I am a living example of an individual benefiting from Andersen's newly discovered modality named *Light Particle Assimilation* (LPA) that he publicly detailed and demonstrated for the first time during his Louisville lecture in July of 2011.

I highly recommend the vitamin, mineral, nutrient and hormonal *Tri-Vibes* and I look forward to additional *Tri-Vortex Technology* products that harness the power and benefits of LPA. Even though each individual woman will need to send their specific menopausal medications to Andersen for treatment in the one-of-a-kind *Tri-Vortex Technology* chamber, the very positive results and benefits are worth the time and effort.

I am scheduled for follow-up blood work and saliva tests during (mid February - 2012) and the results are available to qualified individuals upon request.

Sincerely,

Ruth A. Billings
