

# **Latest First Hand Observations & Applications Via Personal Experiences With Mold Poisoning, Spider Bite Plantar Fasciitis & Tooth/Gum Infection**

This essay is about series of events that occurred with Linda and I (mostly me) over the past year that resulted in cutting-edge discoveries for addressing various kinds of health challenges and issues. Of course the solutions involved *Nemenhah Certified Sacrament Provider Tri-Vortex Technology* but also additional modalities that are now part of and integrated with the *Tri-Vortex Technology* experience. This past year I have experience being patient, student, researcher and inventor simultaneously for these intense 12 months.

## **Wet Walls**

In the Fall of 2013 we noticed the walls in the front bedroom of our Royal Palm Beach, Florida rental home that are near the central air-condition unit were totally soaked in water. Over a five year period we had 42 service calls on the defective air conditioning unit. A semi-closed off square wooden area about four feet in diameter and the main air duct for the air-conditional system was opened by technicians. The walls of the cubby space were completely covered in toxic mold.

Because I traveled to Singapore via Cape Town for a 25 day period during the late summer of 2013 period to deliver a *Stem Cell Stimulator* unit to my new good friend BK Wee, I had less exposure to the toxic mold than Linda. She began having itching and rash symptoms on her back and toes a month before me.

However, the rash with oozing pimple like pustules spread all over my body in late October of 2013. The various *Tri-Vortex Technology* products and a *Tri-Vortex Technology* treated colloidal silver gel recommended by Dr. Todd Rappaport MD reduced the itching and burning to almost nothing but the skin eruptions expanded to every part of my body.

## **Investigation**

My internet investigation revealed that traditional medicine does not even have a logical approach, much less a treatment and cure for the

symptoms of any form of mold poisoning. The last time I made an appointment with a medical doctor was when I was 23 years old. I had emergency treatment by a medical doctor in 1988 that is chronicled in this PDF <http://trivortex.com/Excerpt.pdf>

My JFK investigation partner Mark Anderson (no relation) and I wangled press passes to the 50th anniversary events of the November 22, 1963 incident on Elm Street in my home town of Dallas, Texas. During that time I was struggling with the annoying and embarrassing pimple like rash. <http://mygodimhit.com> My full court basketball playing at the age of 61 did not miss a step while I covered my legs with sweat pants and wore tight pull over sleeves on my arms. I also wore pants and long sleeves shirts when in public..

Meanwhile I was also trying every alternative modality possible such as apple cider vinegar, Dead Sea salts and an array of minerals, vitamins, salves, oils, and topical treatments all treated in the *Tri-Vortex Technology* chamber. Nothing was inhibiting the growth and presence of the pimple like rash. Again, the *Tri-Vortex Technology* Disc, *Tri-Vibes*, Tri-Intra-Sound, Laser and Ion Generator along with the colloidal silver gel, kept the itching and burning to almost nothing.

Florida is in a tropic humid zone and the moist heat was the major contributing factor to my misery. I had temporary relief when Linda and I began spending hours in a specially designed salt room but the symptoms returned when I was reentered the humid climate. <http://thesaltsuite.com>

## **Ozone**

While attending continuing education courses in Orlando, Florida for her Veterinary license in late January of 2013. Linda was clobbered by a very strong flu condition that put her in bed for two days. She barely made enough classes to meet the required hours. The last evening lecture she attended was by a DVM explaining the benefits of Ozone Oils and Suppositories for all kinds of health conditions related to animals.

### **What is ozone?**

Ozone is also known as activated oxygen. Oxygen is O<sub>2</sub> and Ozone is O<sub>3</sub>, meaning it contains three oxygen molecules instead of two. After a short time, that third molecule will break off and start the work of ozone therapy.

Ozone has been in use in medical applications since the early 1900s. It is used around the world in countries like Russia, Italy, Germany, Cuba, Mexico and more. Some states in the US also approve it for therapy.

### What about side effects?

Ozone has been shown to be free from major side effects and extremely safe. A 1980 study in Germany for the German Medical Society polled 644 therapists about 384,775 patients. In this group over 5.5 million ozone treatments were done and only 40 cases of side effects...

The last statement the DVM made was that the Ozone Suppositories assisted in relieving the symptoms of the flu. After securing some samples, Linda placed the Ozone Suppositories on the *Tri-Vortex Technology Disc* for three minutes before insertion. To her amazement, the flu symptoms reduced by about 70 percent over a four hour period.

A major blood artery runs adjacent to the rectum where the suppository is inserted. Therefore the *Tri-Vortex Technology* treated Ozone is immediately absorbed and distributed throughout the body. The Ozone in the blood stream and the topical Ozone Oil totally encapsulate the body with healing O<sub>3</sub> molecules. The Ozone Oil must be used with caution when worn with clothing. The thick oil will create a fabric stain that will not be removed by normal detergents or any other means.

### Structured Ozone

The next day I secured an Ozone oil and Ozone oil suppositories. Both items were placed into the *Tri-Vortex Technology* treatment chamber for 24 hours. <http://trivortex.com/Intro.html> Why? Our bodies have a complex molecular structure and when we introduce any material that does not match that level of coherent structure, our cells struggle to absorb those materials. Humans are like expensive Ferraris...high performance biological and mechanical entities demand liquid and solid fuels that have the highest coherent molecular structure. Would you put chaotic regular gasoline into a your Ferrari? Then why put chaotic liquids and solids on and into your body?

The first indication that our bodies will have difficulty assimilating a liquid, gel, oil or solid is a pungent smell and taste. When grapes are first crushed into wine, the nectar has a bitter smell and taste because the

molecular structure does not have the proper level to be absorbed by our cells, Hence the wine is aged to organize the molecular structure so the liquid does not trigger our taste and smell senses to have negative reactions. When a liquid, gel, oil or solid has a smooth and silky smell and taste, maximum absorption into the cells will occur. More details are in my booklet titled *Super Hydrate & Charge Your Cells* and is available as a free PDF. <http://trivortex.com/super-Hydrate.pdf>

The *Tri-Vortex Technology* treatment chamber organizes molecular structure of any substance therefore mitigating the intense pungent smell and taste of the Ozone Oil and Suppositories. The *Tri-Vortex Technology* treatments maximize the absorption of the Ozone. For the first week I applied the oil to the rash twice a day and inserted the suppositories every six hours. After the first week I applied the oil and inserted the suppository once a day.

The symptoms of the mold poisoning slowly began to subside. One week after I began the Ozone products, I also had acupuncture sessions and began taking prescribed Chinese herbs for a six week period along with a temporary restricted diet.

By the middle of March of 2013 the rash was mostly gone but I would have flare ups of the pimple like rash. The Ozone Suppositories were reduced to one a week unless I had a flare-up. That same month Linda and I decided to move from Florida to San Diego, California. Supposedly the mold was totally removed by tear-outs and replacements of the cubby hole and the bedroom walls. When we moved the bookcases in the adjoining room during May of 2013, we discovered that wall was also wet and saturated with mold. Until we moved out of the house the flare-ups were caused by continued exposure to the mold but the *Tri-Vortex Technology* treated Ozone Oil and Suppository eliminated the symptoms. Since we have been living in the dry arid climate of San Diego, there have been no symptoms of mold poisoning.

### **Pounding Feet On The Stone Step Slabs**

Our two story rental home in San Diego has stone-slab stair cases. I bounced up and down the steps in my Keen sandals and bare feet while also playing full-court basketball at my home work-out place named *The Sporting Club*. At first my the interior side of my right heel was sore and

then painful. One day after I tried to jump while playing basketball, I could barely walk because my heel had acute pain due to Plantar Fasciitis

Again an Internet search revealed that traditional medicine had no treatments or cures for this painful foot condition. Two of my high school basketball teammates suffered from Plantar Fasciitis. One had to reluctantly retire from the basketball court at age 55 and the other former athlete has been off and on crutches and wheelchairs over the past ten years due to the excruciating pain.

I immediately applied all the tools of *Tri-Vortex Technology* including the *Stem Cell Stimulator* with the water table and the Ozone Oil. <https://vimeo.com/91872025> I also investigated and tried every modality and product that made claims about heel pain and Plantar Fasciitis with minimal or no positive results. Orthotic shoe inserts and orthotic clogs did assist the condition.

But then I began palpating and putting low to high pressure around my entire foot and ankle area and discovered a familiar pain sensation. Three years ago I developed a Sciatica condition on my right leg and while having a professional massage, the therapist discovered a very sensitive area just above my knee. This area of the body has a minimum amount of blood and lymphatic vessels so toxins can easily build in the muscle tissue.

After I successfully addressed this area with the *Stem Cell Stimulator*, the Sciatica was gone and I have since treated countless others with my one-of-a-kind approach.. Individuals using canes and wheelchairs due to Sciatica, no longer use their walking aids after three to five *Stem Cell Stimulator* sessions. All persons with Sciatica who have followed the *Stem Cell Stimulator* protocols on a daily basis have experienced long-term daily relief from the symptoms of Sciatica.

When I put pressure on interior portion of the tibia (shin bone) near the ankle, I had acute pain where a major lymphatic vessel connects to the heel. Could stressed lymphatic vessels in the ankle and foot areas be the major contributing factor to Plantar Fasciitis? I was not waiting for traditional medicine to determine whether or not pounding my feet on the stone staircase slabs with bad arch supports caused my ankle and foot lymphatic vessels to become inoperative.

Once I began to treat the entire ankle and foot areas with emphasis on the lymphatic vessels that remove toxins from the body, the symptoms of the heel injury began to slowly reduce. I missed only one week of full-court basketball and I continued to play every Tuesday and Thursday at noon. However, one more discovery would assist in healing my heel.

### **Brown Recluse Spider Encounter**

Two weeks into my Plantar Fasciitis I felt a pain in right elbow. One day later I noticed that the skin on my elbow was flabby and I had severe tenderness when I pressed on the bone under the flabby area. Then the entire arm and hand swelled to three times the normal size over 24 hours. Finally a piece of necrotic (dead) skin peeled off my elbow that blew up like a balloon. Obviously...time to take action before my arm and hand disintegrated into a pile of oozing mushy dead cells that would have fallen off or had to be surgically removed.

Another internet search revealed that three arachnids dominate the Southern California area - Black Widow, Wolf and Brown Recluse spiders. All my symptoms were a classic case of a high venom dose by a Brown Recluse. Had this been a snake bite, gunshot wound or trauma from a car accident then seeking help from the traditional medical community would have been more than appropriate. Again, the traditional medical community does not have a coherent and effective approach to spider bites except worthless antibiotics and disfiguring surgery.

<https://www.youtube.com/watch?v=5Fk9LI4Rmcg>

Again, colloidal silver gel and Ozone Oil were applied along with the *Stem Cell Stimulator* sessions to the elbow, arm and hand areas. I inserted Ozone Suppositories every four hours. I was bitten on either a Friday or Saturday and by Monday I had an intense three inch wide hematoma (bruise) from the lower ulna bone near the wrist (arm bone on the same side as the pinky finger of the hand) to my armpit area. The dark area appeared as if an artist painted on a black racing stripe.

I postulate the hematoma was caused by a totally overwhelmed and decompensated lymphatic system. The forearm area under the small finger was very tender to touch. Eventually these hematoma areas would also probably degenerated to necrotic dead tissue that would have fallen off or had to be surgically removed.

On Sunday night I wrapped the arm and hand with an activated charcoal poultice with no change to the infected areas.

On Monday I added the ingredients used in the *Tri-Vibes* to the Ozone Oil. <http://trivortex.com/Tri-Vibes.html> That evening I applied a layer of colloidal silver gel, a layer of vitamin E and a layer of *Tri-Vibes* enhanced Ozone Oil. I wrapped the entire arm in surgical gauze that allowed room air to interact with the Ozone Oil. There was no change in the condition when I removed the gauze four hours later. At this point Linda, trained in traditional medicine, was urging me to go to the emergency room of a traditional medical hospital.

### **Nope...not yet**

I was also trained as a photo-journalist in college, worked as a staff photographer and freelancer and I have an array of professional camera equipment. Regretfully taking pictures of my arm and hand did not even cross my consciousness. I was in total survival mode while concentrating all my time and energies on how to reverse my dire condition.

The entire incident was observed by my future wife Linda Ann Boone DVM whose resume provides a slew of doctors that can testify to her honesty and integrity related to any stated observations. I also had extra motivation to save my arm - Linda and I will be married on October 31, 2014 and I did not want missing arm and hand parts to dampen the ceremony. I wanted to put the ring on her finger with a healthy right hand and a fully functioning right arm.

On Tuesday evening I thought my arm was going to erupt like a volcano due to the intense swelling. The only answer traditional medicine has to counter this condition is to make small incisions into the inflammation with a scalpel. At 11pm I applied a layer of colloidal silver gel, a layer of vitamin E and a layer of *Tri-Vibes* enhanced Ozone Oil. However, I wanted to go to sleep so rather than wrap the swollen arm and hand with surgical gauze I encapsulated the arm with cellophane. I did not want the Ozone Oil to stain the bed sheets. I inserted a suppository and was asleep by 11:30pm.

At 1:00am the area of the hematoma began to first itch and then felt like my arm was being lightly roasted over a campfire. I have never had such an intense sharp tingly pain in my life. Finally the pain subsided. At 3am and I took off the cellophane wrap. When I looked at my arm I thought that I was in the middle of a surreal dream.

I woke Linda and told her she had to look at my arm. As she was coming around the bed to look at my arm, she chuckled and said "Well... you are finally going to have to be treated by a real doctor." The smile on her face vanished when she looked at my arm. Linda always has an opinion on everything...something she developed over the years as an emergency room Veterinarian and an expert spay/neuter surgeon.

Linda was speechless as her mouth dropped open in silence.

***The hematoma was totally gone and my skin was a healthy pink with the swelling reduced by 85 percent! - A four-hour heal job!***

What happened? The lymphatic system was shut down, so where did the dead blood cells and toxics migrate to? I urinated and defecated my normal color, amount and smell so the O<sub>3</sub>, dead cells and toxins were not excreted via the bladder or bowel.

I postulate that because the cellophane separated the Ozone Oil from the atmospheric Oxygen, all the ingredients in my layered concoction had no choice but to interact with the **MOLECULES** of the dead cells and toxins. The *Tri-Vibes* work via a modality I named ***Light Particle Assimilation*** with the key component being a Phosphorous based sheath that envelopes all human, animal and plant cells. But the layered concoction worked in just the opposite manner via the Phosphorous based sheath - ***Light Particle Dissemination*** of the O<sub>3</sub> accompanied by the molecules of the dead blood cells and toxins into another dimensional state beyond the human senses. In other words the O<sub>3</sub> pulled the molecules of the dead blood cells and toxins into a portion of space and time that cannot be detected by smell, touch or sight. Scalar waves?...probably..

However I further postulate that the final step of the migration took place beyond the skin. The burning sensation was caused by the O<sub>3</sub> and the molecules of the dead cells and toxins transporting through the pores the skin that triggered a pain sensation transported by the nerves. The final migration of the O<sub>3</sub> and the molecules of the dead cells and the toxins into another space-time dimension occurred after those entities exited the pores of the skin. The O<sub>3</sub>, dead cells and toxins could not disperse into the

atmosphere because my arm and hand were wrapped in cellophane. **Light Particle Dissemination** of the dead cells and toxins via the O<sub>3</sub> was the only means whereby the dead cells and toxins could exit the body.

The next day small pustules that are classic symptoms of a Brown Recluse bite emerged on my wrist but disappeared within 24 hours after applying my silver/E/ozone concoction enclosed by the cellophane. The above events are classic cases of advanced subtle energy technologies.

The only remnant of my spider bite as I write this essay is a small pocket of water and cells on my elbow area. I am working on bring back the elbow to normal shape and function over the next year. Last Tuesday I played five games of full court basketball and my team won every game and I averaged two baskets per game while I held my opponents to three baskets over the five games. Age of my opponents? - 25 years younger.

### **Turning Point**

My right heel was functioning at 80 percent one week before playing the Tuesday games detailed above. Five days before those Tuesday games I applied a layer of colloidal silver gel, a layer of vitamin E and a layer of *Tri-Vibes* treated Ozone Oil to my entire ankle and foot area.

I wrapped the entire foot with cellophane treated in the *Tri-Vortex Technology Chamber*. There was some minor itching and burning. That was the turning point to bring my heel to 95 percent function. Now I do all the cuts, jumps and twisting needed to maintain my basketball game at the highest level of my ability. The orthotic inserts would have eventually brought the heel to a 95 percent function but the *Tri-Vibes* enhanced Ozone Oil and Suppository rapidly healed my heal.

### **Jaw Bone Infection**

Today, "Modern" dentistry's only treatment for an infection or inflammation in the jaw bone area is a to perform a root canal or pull the tooth and clean out the jaw bone even though an x-ray proves the actual root of the tooth below the infected area has no decay or complications. Is there an alternative to a root canal or pulling a tooth when an infection or inflammation in the jaw bone area occurs due a normal fully functioning tooth leaking toxins into the jaw bone or stress on the tooth? Here is my experience and you can make your own decision

Eighteen months ago I had the veneers of my two front upper teeth replaced after they were originally installed in 1999. The right front veneer was very snug and tight against the adjacent tooth. Two months ago the replacement crown on a root canal on the right upper side also fitted in very snug and tight. Did the tight fitting crown cause pressure to build up on the right front veneer that was already tight against the adjacent tooth?

After eating dinner on September 13, 2014 and about one month after covering the spider bite symptoms with the Ozone Hemp Oil and cellophane, I felt like a piece of food was jammed into the gum between my right front veneer and the adjacent tooth. After flossing, Waterpik treatment and brushing the teeth and gum areas, not only was there was no change in the discomfort sensation but the situation transitioned into full blown out-of-control pain situation.

All *Tri-Vortex Technology* modalities did not relieve the increasing pain as my gums and upper lip swelled while I had intense flu-like symptoms of nausea, joint pain and dizziness with no vomiting or diarrhea. I could only sleep for about an hour because the pain would wake me up. When tapping my jaws together, I felt severe pain in my right front veneer and the adjacent tooth. When I flicked my right front veneer and the adjacent tooth with my finger or a hard object, there was severe pain in the jaw bone above both teeth.

As the intense flu-like symptoms continued the next morning I had nasal drip and congestion. As I held my finger over my right nostril to blow out drip in my left nostril I had very sharp pain inside my right nostril. The cartilage in my right nostril was inflamed and at inside tip of my right nostril was a pouch of liquid. This pain rapidly took over as being the primary area of intense discomfort.

September 21st to the 23th were equal in misery to the time just before I applied the *Tri-Vortex Technology* Ozone Hemp Oil to my brown recluse spider bite. The lack of sleep and food caused me to have severe sinus headaches in my forehead and where the spine and skull connect on the backside. The headaches were relieved slightly by performing ear coning and using the *Tri-Vortex Technology* personal ionizer and pointer laser <http://trivortex.com/AirTamer.html> <http://trivortex.com/Laser.html>

I speculated that the tight crown caused stress on the tooth adjacent to right front veneer. Linda and others felt the cause was tooth rot. I made an emergency appointment with my dentist (he did not do the veneers) for

9:00am Wednesday September 24th. However, I did have a good night's rest due to an very controversial substance that is not a sleeping pill

### **The Controversy**

One of the longest and best distributors of *Tri-Vortex Technology* suggested a very controversial liquid called *Miracle Mineral Solution* (MMS) that is a 28 percent chlorine dioxide solution (some accuse this of being industrial bleach) and mixed with an acid such as citrus juice with no vitamins or just pure water (no chlorine).. I had heard about MMS over five years ago but disagreed with using ridiculous doses that cause vomiting and diarrhea so I just blew-off the entire subject. However, the long-time *Tri-Vortex Technology* distributor never used MMS in the high dose manner but only in small doses with long-term success and no complications or contra-indications for 10 years.

On a one time emergency basis only, I drank four ounces of *Tri-Vortex Technology* treated distilled water with 14 drops of *Tri-Vortex Technology* treated MMS at 1:00am on September 17th. For the first time in three days I slept six straight hours and when I woke-up the bed sheets were completely soaked with my perspiration. All the flu-like symptoms and the headaches were gone and I felt mostly normal but starved. The pain in my teeth and nose was still as severe as ever but I had no vomiting or diarrhea.

The dental x-ray revealed the root of my right front veneer tooth was fine but a massive dark area or infection was in my jaw bone above the right front tooth with the veneer. The dentist concluded that food particles managed to get between the veneer and the tooth and into the root. The food particles turned into toxins that flowed into the jaw bone creating an infection that caused all of the swelling, pain and flu-like symptoms.

My viewpoint in retrospect is the possibility of food particles becoming trapped between the tooth and the veneer is very remote. I believe the tight fitting veneer and the tight fitting crown caused constant stress on the right front tooth thus food debris built-up in the root. Or no food particles entered the root and simply the constant stress on the front tooth caused initially swelling that transitioned into an infection.

The dentist recommended I immediately begin taking 500mg of the antibiotic amoxicillin and I immediately have a root-canal procedure on the tooth. However he believed that due to the location of the infection the root canal procedure needed to be completed by a dentist specializing in

endodontics. I was out the door with the prescription in my hand and an appointment for a root canal at 10:45am Friday September 26th. I filled the antibiotic prescription and took the first pill.

### **The Inquiry - Taking Action - The Results**

While investigating the impact of MMS on tooth infections on the internet, I came across two individuals who put both MMS and DMSO into a Waterpik and cured their tooth infections. I immediately ordered 99.9 pure industrial grade DMSO for next day delivery. I placed 22 drops of *Tri-Vortex Technology* treated MMS into the Waterpik reservoir and then filled the container 3/4 full with *Tri-Vortex Technology* treated distilled water. I put the jet flow on a low power because I repeated the application every two hours. My normal once a day high intensity flow would have caused irritation to the gum line.

The pulsing water and MMS were applied to the both the front and back side of the right front tooth with the veneer and gum. After each MMS treatment I soaked the tooth and gum with *Ozone Hemp Oil enhanced with Tri-Vibes*. that has a tart taste and smell but dissipates rapidly

Six hours later and after my third treatment with the MMS being delivered via the Waterpik and Ozone Hemp Oil applied by a toothbrush to the right front tooth with the veneer and the surrounding gum area, ***all the symptoms of pain, soreness and swelling related to the tooth infection in the jaw bone were gone.*** When tapping my jaws together, I had no pain in my right front veneer and the adjacent tooth. When I flicked my right front veneer and the adjacent tooth with my finger or a hard object, there was no pain whatsoever. I repeat these simple tests every two to four hours.

I then had a moderate slimy nasal discharge out of my right nostril that had dark brown and grey colors and a very foul putrid smell. When I felt into my right nostril, the cartilage was back to normal and the pouch of liquid at the inside tip of my nostril was gone. I kept the Waterpik and Ozone Hemp Oil treatments going every two hours till I went to sleep at 12pm Wednesday night.

Because I was totally back to normal, I saw no need to continue the antibiotic on Thursday morning and I cancelled my root canal appointment. I did three treatments a day on Thursday and Friday. The first treatment with 22 drops of the *Tri-Vortex Technology* treated DMSO added to the Waterpik reservoir was Thursday afternoon

The dark areas in a jaw bone x-ray mean the infection had caused loss in bone density. Probably bone density could not be restored in few days but the infection in my case is completely gone. Over the next 30 to 45 days the bone density could increase with the use of the *Stem Cell Stimulator* and *Tri-Vibes*. Based upon this dynamic, I will wait on taking a follow-up x-ray for another 30 to 45 days. Watch for the follow-up post that will include the before and after x-rays.

### **Your Opportunity**

Please email me if you would like to incorporate the *Tri-Vortex Technology* enhanced Ozone Oil and Suppositories into your treatment modalities.

*Tri-Vortex Technology* is now privately marketing.

1. Treated Ozone Hemp Oil enhanced by *Tri-Vibes*
- 2 Treated Ozone Castor Oil and Hemp Oil Suppositories

Website page featuring new Ozone products will be posted when the items are secured as *Nemenhah Sacred Sacraments*. The Ozone products can be purchased as of the date of the email notice.

Call or e-mail for prices.
