

Tri-Vortex Technology

Subtle Energy Products

Why the Tri-Vortex Institute?

After the individual signs the TVI disclosure form, <https://trivortex.com/Disclosure-2018.pdf> the staff presents the *Tri-Vortex* protocols that address:

1. A very effective means of cleansing the **teeth** of bacteria that could be contributing factors to all kinds of negative health conditions in the upper portion of the body.
2. A very effective means of cleansing the **gut** of bacteria that could be contributing factors to all kinds of negative health conditions in all parts of the body. This cleanse lasts for a minimum of eight days.
3. A very effective way of making liquids wetter so the body has maximum absorption of both liquids and solids. Dehydration due to poor absorption of

liquids is the main contributing factor to all negative health conditions.

<https://trivortex.com/Disc.html>

4. A very effective way to absorb vitamins, minerals and nutrients via a revolutionary process called *Light Particle Assimilation* (LPA). One can now wear rather than swallow their vitamins, minerals and nutrients via the *Tri-Vibes*. This is real not science fiction. <https://trivortex.com/Tri-Vibes.html>
5. A very effective way to absorb four wavelengths of infrared light that function as carriers for LPA of vitamins, minerals and nutrients. <http://trivortex.com/TIB.pdf>
6. A very effective means of absorbing multi-frequencies ranging from 10Hz to 110Hz that function as carriers for LPA of vitamins, minerals and nutrients. The technology is called the *Tri-Intra-Sound Unit* and has rapidly lowered the blood sugar levels of diabetics. <https://trivortex.com/Intrasound.html>
7. A very effective way to absorb oxygen ions that function as carriers for LPA of Magnesium and Iodine that normally are very difficult to absorb by the human body. This technology is called the *Nano Oxygen Accelerator* (NOA) <http://trivortex.com/NOA.pdf>
8. A very effective way to replace missing tones in the body and especially 40Hz that has been scientifically proven by MIT to be linked with Alzheimer's. All other marketers of products generating the 40Hz frequency have no precise control over the frequency, phase and amplitude. TVI has very expensive proprietary software that creates not only the most effective, correct and precise 40Hz frequency, but a cornucopia of frequencies impacting all kinds of health conditions. TVI has no competitors in the precise frequency delivery arena.
9. A very effective way to transfer HHO or Brown's gas into the body that has been treated by the unique *Tri-Vortex Oxygen-Ion Amplifier* (O-I Amp) that shatters the hydrogen molecules into ions. Maximum absorption occurs after the hydrogen has been reduced to the ion level.
10. A very effective way to detox the body via what is called the *Cling-Wrap-Protocol*. <http://trivortex.com/King-Cellulitis.pdf>
 - A. Silver hydrosol spray is applied to both feet
 - B. Silver hydrosol gel is applied to both feet
 - C. Ozonated Oils are applied to both feet
 - D. Both feet are wrapped with a thin layer of cellophane (Cling-Wrap)
 - E. Persons with toxins in the body have very moist or even wet feet when the Cling-Wrap is removed one to four hours later.
 - F. The detox has instigated drowsiness but after a short nap the individual feels very energized.
11. A very effective means to deliver hemp, CBD and other oils into the lungs via an air pump, the O-I Amp and an ozone generator, bubbling jar and nasal cannulas. The ozone generator is powered by the two positive poles of an amplifier that is connected to a computer generating the Tri-Vortex frequencies. The positive based ozone and oils are attracted to the ground plates connected to the negative poles of the amplifier and applied to the target area. The TVI has the

only system in world that provides maximum absorption of Hemp based oils in the lungs and the target area.

12. A very effective way to stimulate stem cells in the bone marrow with the special *Tri-Vortex* positive based frequencies that attract the stem cells or stem cell energies to the applicators on the target area that are connected to the negative poles of the amplifier. Once the stem cells or stem cell energies reach the target area, additional frequencies are applied to turn-on the DNA of the stem cell for maximum assimilation of the stem cell into the body part.
13. The most effective and powerful ozonated oils on the market.
<https://trivortex.com/oils.html> - Former name was *Transformed Plant Oils* – new name is *Totally Ozone Oils*.
14. TVI sessions are 55 minutes @ \$200.00 per session for five prepaid sessions and \$190.00 for 10 prepaid sessions. Sessions are available only as packages and not available as a single purchase service.

Do the TVI protocols and products improve the quality of life? Watch these videos for the resounding answer - <https://vimeo.com/user15258803> - For every one video there are an additional 20 persons who improved their quality of life but did not make a video testimonial.
